No action necessary

Does this solve the problem?

1] Yes

2] No

3] I don't know

- **Explanation**
Turbine will shut down when 10 minute average wind speed is

  - For NM72/1500 EVO-I = 20m/s.
  - For NM82/1500 EVO-I = 18m/s
  - For V82 = 20m/s

It will automatically reset in 10 minutes if 10 minute wind speed has dropped to or below

  - For NM72/1500 EVO-I = 17m/s.
  - For NM82/1500 EVO-I = 16m/s
  - For V82 = 18m/s
